Midterm Examination

Semester I, Academic Year 2022-23

Student Name			
Student ID			
Department	Information Technology		
Section		**Venue**	

Course Code & Name	CSCM1101: Fundamentals of Computing and Information Systems		
Specialisation	IT	**Level**	Diploma Year 1
Date	30/10/2022	**Time**	60 Minutes

INSTRUCTIONS TO CANDIDATES

- Do not open this question paper until told to do so.
- Fill in the above details.
- Use black or blue pen only. Pencil may be used for drawing or graph.
- Electronic devices are not allowed in the examination venue.
- Scientific calculators can be used if only allowed by the course teacher.
- Copying or cheating or malpractices of any kind are strictly prohibited. Violations will be promptly reported to higher authorities, and serious actions will be taken according to university regulations.
- Verify the total number of answer sheets in this examination (5 pages including cover page).

FOR VALUATION PURPOSE ONLY

Section	Marks Allocated	Marks Scored	
A	8		_____
B	6		**20**
C	6		
Total Marks	20		

Marked by:

Name_____ Signature _____ Date _____

8

Section – A (8 × 1 = 8 Marks)

Choose the correct option

1. When information can be used only by the authorized users in the organizations this indicates which information characteristic:
   A. Simple
   B. Accessible
   C. Reliable
   D. Accurate

2. Opensooq and eBay are types of:
   A. Business-to-Consumer (B2C)
   B. Business-to-Business (B2B)
   C. Consumer-to-Consumer (C2C)
   D. Business-to-Government (B2G)

3. Software that allows different software applications or different systems to communicate.
   A. Middleware program
   B. Utility Programs
   C. Application program
   D. Device Driver program

4. Bank loan management system is a type of:
   A. Transaction Processing Systems (TPS)
   B. Management Information Systems (MIS)
   C. Decision Support Systems (DSS)
   D. Executive Information Systems (EIS)

5. In the value chain Model, the Inbound logistics and Outbound logistics consider as:
   A. Primary Activities
   B. Support Activities
   C. None of these
   D. All of these

6. One of the Business Value of Telecommunication Networks is to collect information on business transactions from remote locations which overcome:
   A. Structural barriers
   B. Cost barriers
   C. Time barriers
   D. Geographic barriers

7. Information systems such as videos, movies, television, music, games, and arts can be found in the environment of _____:
   A. Government
   B. Health care
   C. Military organizations
   D. Entertainment

8. Which is the E-Commerce Success Factor that gives online customers with special interests a feeling of belonging to a unique group of like-minded individuals?
   A. Personal Attention

   C. Advertising and Incentives
   D. Great Customer Communications

Section – B (1+2.5+2.5 = 6 Marks)

6

Answer the following:

9. Define Business information system (BIS). (1 Mark)

10. List Porter's Five (5) Forces Model. (2.5 Marks)

11. Describe two competitive strategies that businesses can follow to counter the threats of competitive forces with an example. (2.5 Marks)

Section – C (1+2+3 = 6 Marks)

6

Analyze the following scenario and answer the question:

It is important to keep track of the employees' presence in any educational institution to ensure regularity and sincere work devotion of them. Therefore, most universities implement a specific attendance monitoring system for a purpose of keeping track of their employee working hours including tutors, managers, and technicians. They deploy a Biometric Fingerprint scanning device that scans worker fingerprints and captures start/end times of employee work, the detailed information will be transferred and preserved on the cloud over the network in a dedicated fingerprint database. By using fingerprint extraction algorithms, the extracted features information that is received from this phase will be compared to each fingerprint class stored in the fingerprint database to perform authentication and recognize the identity of each teacher. In the end, the Enterprise resource planning (ERP) program that is attached to the system generates a detailed document for human resources manager that clarify for them the time employees work and the time they take off each month, and based on tutor attendance, they take actions such as giving them a promotion or reducing their salary.

Describe what is the main role of the attendance monitoring system. (1 Mark)

12. What is the type of information system that has been deployed in this scenario? Why? (2 Marks)
13. Illustrate the IPO (inputs, processes, and outputs) of the mentioned information system? (3 Marks)
