Question **7**

Not yet answered

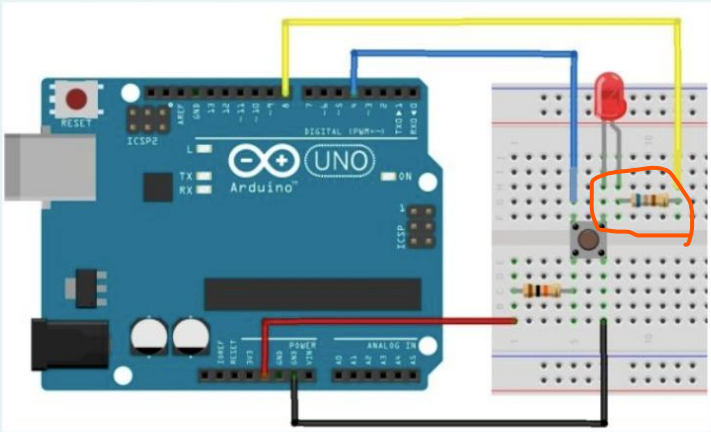
Marked out of 4.00

Flag question

Refer to the LED and push button circuit diagram and Arduino sketch given below. When the push button is pressed, LeD should turn on otherwise it should be off. The circuit is correct, however, the program is not working.

Identify the errors in the codes and provide the correct statement of codes in the spaces provided below. (2 marks)

Answer the questions given below (2 marks)



```
int buttonpress = 0;
void setup()
{
  pinMode(5, INPUT);
  pinMode(8, OUTPUT);
}
void loop()
{
```

Quiz navigation

1 2 3 4 5 6 7 8
9 10 11 12 13 14 15 16
17 18 19 20 21 22 23 24
25 26

Finish attempt ...

Time left **1:51:04**

```
{
  buttonpress = digitalWrite(4);
  if buttonpress == HIGH)
  {
    digitalWrite(8, HIGH);
  }
  else
  {
    digitalWrite(8, LOW);
  }
}
```

1) Error 1 (copy and paste the program statement which has error) :

pinMode(5,INPUT);

Correction for error 1 (type the correct code here):

pinMode(4,INPUT);

2) Error 2 (copy and paste the program statement which has error) :

IF buttonpress ==HIGH)

Correction for error 2 (type the correct code here):

IF (buttonpress ==HIGH)

3) How many active components are there in the circuit ?

1=led

4) What will happen to the circuit if the resistors are not connected ?

the LED will burn

Flag question

What is the purpose of the tools available in the Arduino IDE software interface toolbar? Choose two. (1 mark)

Select one or more:

- Upload the program
- Program feedback
- Help feature
- Text editing features
- Verify the code

•The MenuBar contains five menus: File, Edit, Sketch, Tools, and Help. These menu items provide access to additional context-sensitive commands that are only available if they are relevant to the work currently being carried out.
•The Toolbar contains icons that provide tools to Verify the code in a program, Upload a program to the Arduino board, create a New program, Open an existing program, Save a program, and open a Serial Monitor.
•The Text Editor is similar to other editors that you may have used. It provides the usual text editing features, including cut & paste and search & replace.
•The Console displays text output, including program feedback, error messages, and other useful information.
