INFORMATION TECHNOLOGY DEPARTMENT

Midterm Examination
Spring, AY 2022/2023
CSPG1205 – Introduction to Programming
Set A

Date: Wed, Mar 29, 2023 **Time:** 2:00 PM – 3:00 PM

Max Marks	20	Time Allocation	1 Hour

Student ID		Student Name	
Section		Level	Diploma First Year

Instructions to the Students

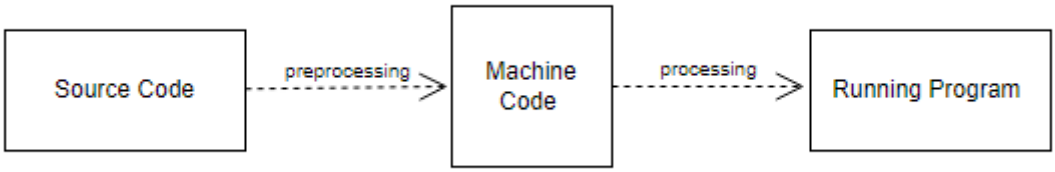
1. Answer the questions in the space provided by using **blue or black pen** only. You will obtain a zero (0) if you use a pencil for all question.
2. Use of mobile phones and any electronic gadgets inside the examination hall is not allowed.
3. ***Copying, Cheating, and any kind of malpractices on the examination are strictly prohibited.*** Action will be taken as per the "Article 80, Bylaws of Colleges of Technology".
4. Students should bring their own pencils, pens, erasers, rulers, and any other tools required for the exam.
5. The exam has a total of **9 non optional questions**.
6. **Use of standard calculators is not allowed for this exam.**

Section	Allotted Marks	Obtained Marks
Section A	**6**	
Section B	**8**	
Section C	**6**	
Total Marks	**20**	

Marked By	Checked/Re-marked by

Section A
Multiple Choice Questions
(6 x 1 = 6 Marks)

1) What type of programming language translator is shown in the following figure?



a) Assembler
b) Interpreter
c) Macro-processor
d) Compiler

2) What is the output produced by the following code?

```
print("Strings are basically just words. \
(collection of characters)")
```

a) SyntaxError
b) Strings are basically just words.\ (collection of characters)
c) Strings are basically just words.
(collection of characters)
d) Strings are basically just words. (collection of characters)

3) What is the output produced by the following code?

```
expr = 12  /  2 ** 1  //  3
print(expr)
```

a) 0
b) 2.0
c) 3.0
d) 6.0

4) What is the output produced by the following code?

```
name = 'Khamis'
city= 'Muscat'

a= 5//2!=0 or city=='Muscat' and name=='Moza'
print(a)
```

a) “True”
b) True
c) False
d) SyntaxError

5) What is the output produced by the following code?

```
a=20

if 50:
    print("This is the if body")
elif a<50:
    print("This is the first elif body")
elif a>50:
    print("This is the second elif body")
print("This is outside the if block")
```

a) This is the if body
This is outside the if block

b) This is the first elif body
This is outside the if block

c) This is the second elif body
This is outside the if block

d) This is outside the if block

6) What is the output produced by the following code?

```
a=1
for i in range(1,4):
    a+= 2
print(a)
```

a) 3
b) 4
c) 7
d) 9

Section B
Short Answer Questions
(2 x 4 = 8 Marks)

7) What is the output of the following python code snippet? **(4 marks)**

```
s = 'an eye for an eye'
# Using for loop
for letter in s:

    print(letter)
    if letter == 'f' or letter == 'o':
        break

print("Out of for loop")
print()
```

Ans.

8) Observe the following Python code very carefully and rewrite it after removing all syntactical errors with each correction underlined. **(4 marks)**

```
user name= input("Enter your name:")
x = int(input("Enter a number:"))
if (x=0):
    print"You entered zero"
elif (x>0):
    print"You entered a positive number"
else:
    x=*-1
    print(f"Hi", {username}, "Number made positive:"x)
```

Ans.

username= input("Enter your name: "**)**

Section C
Writing Program Questions
(1 x 6 = 6 Marks)

9) Write a program to display all the numbers, which are divisible by 13 but not by 3 between two numbers entered by the user, using a while loop. **(6 marks)**

Sample Output:

```
Input --->
Enter a number:100
Enter another number:200
---> Output
104,130,143,169,182,The End
```

Ans.
