Final Examination – PRACTICE 1

Section – A

Instructions:

- Write your Computer Number _____.
- Download the resource folder from the eLearning portal.
- Extract the folder to your desktop and rename it as "Name-YourID-Final". e.g (Ali-56J1234-Final).

1. Open the given **life.html** and do the following using **any CSS type**.

1.1 Include all the basic HTML structure and elements. Use the blank spaces, basic tags, and line breaks wherever necessary.

1.2 Set the text "FLOWERS HOME" as the largest heading to the center.

1.3 Set the text "Introduction" as heading 3.

1.4 Style the body margin as 50px

1.5 Use necessary tags and symbols to format the paragraph as shown below.

There are over 25,000 species of ***orchids*** © and they grow everywhere. In the wild, you will see them sprouting out of tree trunks, but at home, they grow best in a pot inside the house. "Orchids need a lot of air around the roots" which is why there are special orchid pots with slats or holes along the sides.

1.6 Design the table with necessary spanning as shown below.

1.7 Insert the given image **"f2.jpeg"** in the first column.

1.8 Add necessary list in the second column.

1.9 Insert a link "https://www.flowers-oman.com/" for the text "Flower" in the third column.

1.10 Apply a double border to the table with the color of your choice and padding of 15px.

1.11 Set the table to center with the pink color header row.

Picture	Lists	Navigation
	1. Rose 2. Lily	Flower
	• Sunflower • Lavender	

1.12 Use aside and section tags to display the output as shown below.

- Aside tag: Float to left, width 200px, border : solid 4px red color.
- Make the section tag as responsive with 2 viewport width.

One of the most popular flowers is lavender.

Flowers have long been appreciated by humans for their beauty and pleasant scents, and also hold cultural significance as religious, ritual, or symbolic objects, or sources of medicine and food. An orchid may be one of the most unusual flowers you can find.

Section A: Output

FLOWERS HOME

Introduction

There are over 25,000 species of *orchids* © and they grow everywhere. In the wild, you will see them sprouting out of tree trunks, but at home, they grow best in a pot inside the house. "Orchids need a lot of air around the roots" which is why there are special orchid pots with slats or holes along the sides.
