والعلوم التطبيقية
University of Technology
and Applied Sciences

English for Academic Purposes (UNEN1102)
Final Examination

Spring Semester, Academic Year 2022-2023

A

Date: Sunday, May 28, 2023	Time: 9:00 am – 11:00 am

Student ID	
Name	
Section	
Exam Venue	

Instructions to the Students

1. Answer the questions in the space provided by using **blue or black pen** only. You will obtain a zero (0) if you use a pencil for all questions.
2. Use of mobile phones and any electronic gadgets inside the examination hall are not allowed.
3. ***Copying, Cheating, and any kind of malpractices on the examination are strictly prohibited.***
4. Students should bring their own pencils, pens, erasers, rulers, calculators, and any other tools required for the exam.

FOR EVALUATION PURPOSES ONLY

Section	Time	Allotted Marks	Obtained Marks
Section A – Reading and Vocabulary	**60 minutes**	**20**	
Section B- Listening (note-taking)	**30 minutes**	**20**	
Section 3 – Reflective Writing	**30 minutes**	**10**	

Marked By	Checked/Re-marked by

Section A: Reading	60 minutes	20 marks

Read the text and answer the questions below.

Interactive Whiteboards

[A] An interactive white board (IWB) is a classroom tool that allows images from a computer screen to be displayed onto a classroom board using a digital projector. It also enables teachers and students to interact directly with the images on the screen using a pen or even a finger. In terms of the teaching and learning process, IWBs promote collaboration and interaction in the lessons. Teachers can share multimedia content which can also foster student engagement.

[B] From blackboards in the 1800s to whiteboards in the 1960s, technological advancements enabled the creation of interactive whiteboards in the 1990s. In 1987, David Martin and Nancy Knowlton planned for the development of interactive whiteboard. They founded SMART Technologies company to turn their idea into reality. Although David and Nancy envisioned interactive whiteboards in 1987, it was Xerox PARC that released the first interactive whiteboard in 1990. It was used for small meetings and round table discussions. It was in 1991 that SMART Technologies was able to launch its first interactive whiteboard that was designed to function as a large display screen. Interactive whiteboards were initially developed as office tools. However, in the late 1990s, the target market for this type of technology had changed significantly when it found a more profitable sector in the educational systems.

[C] A variety of new technologies such as interactive whiteboards are becoming increasingly popular in modern classrooms. In 2008, SMART Technologies introduced new products such as SMART document camera, collaborative learning software and the SMART Board 600i. A year later, Promethean, made history when they designed the world's first environmentally certified and low cost interactive whiteboard. They developed ActivinSpire software for the ActivBoard and PolyVision. In 2015, SMART Technologies launched the SMART Kapp IQ ultra-HD display. In 2020, it was reported that interactive whiteboards manufacturers like Promethean, Ricoh, and BenQ, had been primarily investing in product innovation and differentiation by integrating new technologies for a broader scope of application.

[D] As major companies continue to improve the capabilities and features of IWBs; educational institutions are finding ways to bring them into their classrooms. The use of IWBs has become increasingly popular because schools and universities recognize the benefits that they bring in the teaching and learning process. However, there are also some problems related to using IWBs. One of the main challenges is the cost of IWBs as they can be expensive to purchase and maintain. There can also be technical issues such as software glitches, which can interrupt the lesson.

Undoubtedly, the use of IWBs boosts student engagement, but the time it takes to prepare lessons and create interactive activities may be a burden for some teachers. IWBs can also be distracting if not used effectively, which can lead to a loss of focus on the lesson content.

[E] Despite some challenges, the use of IWBs in classrooms is on the rise. According to a study by Futuresource Consulting, as of the end of 2021, there were 6.2 million IWBs installed in schools around the world. This suggests that more and more schools and teachers are seeing the benefits of using IWBs in the classroom. They have also found some potential solutions to the challenges associated with IWBs. For instance, some schools have adopted cost-effective options to afford interactive whiteboards. They also hired dedicated staff to help teachers address some technical issues related to the use of interactive whiteboards. Teachers are also encouraged to use pre-made resources, which can save time on lesson preparation. Moreover, teachers should set clear expectations for the use of IWBs in the classroom to minimize distractions. With careful planning and effective use, IWBs have the potential to transform the classroom and improve student achievement.

Questions:

1. Choose the most appropriate main topic of the passage. [1 mark]

A. Interactive whiteboards and K-12 educational system

B. Major companies that develop interactive whiteboards

C. How interactive whiteboards make their way into modern classrooms

D. The role of technology in promoting student engagement

2. Match a suitable heading for each paragraph. The first one is done for you. [3 marks]

Heading	Paragraph
1. Some challenges in using IWBs	D
2. Companies' continuous commitment for improving IWBs	
3. Possible solutions to challenges of using IWBs	
4. The conception and development of IWBs	

3. Decide whether the following statements are True (T), False (F) or Not Given (NG). [2 marks]

1. Users can indirectly touch images displayed on an interactive whiteboard.	**T**	**F**	**NG**
2. IWBs were primarily created for classroom use.	**T**	**F**	**NG**
3. Teachers believe that the benefits of IWBs outweigh their drawbacks.	**T**	**F**	**NG**
4. The global interactive whiteboard market is expected to reach $2.8 billion by 2025.	**T**	**F**	**NG**

4. Complete the following table with the information from the passage. Write *NO MORE THAN THREE WORDS* in each space. [4 Marks]

Challenges	Possible Solutions
High purchase cost	**A.** _____
Technical issues	**B.** _____
C. _____	Use pre-made resources
Distraction	**D.** _____

5. Complete the diagram of the history and development of interactive whiteboards (IWBs). Write NO MORE THAN FOUR WORDS OR A NUMBER. [3 marks]

Development of Interactive White Boards

• **1.** _____ and **2.** _____ thought of developing IWBs.	1987
• **3.** _____launched the first IWB.	1991
• SMART document camera became available.	**4.** _____
• Promethean released the first environment friendly and economical IWB.	**5.** _____
• SMART Technology introduced **6.** _____ display.	2015

6. Choose one paragraph (B, C, D, or E) from the passage and write a 30-word summary of it. [2 marks]

Summary of Paragraph _____ ***(Write the letter of the paragraph)***

_____

_____

_____

_____

_____

_____

Content (1 mark)	Organisation (0.5 mark)	Language (0.5)

7. Choose the most appropriate word to complete the following text. [5 marks]

~~availability~~ / funding/ potential/ impacts / advancements/ skeptical / minimize data/ perform / issues/ network/ facilitate/ devices

The **~~availability~~** of promising technologies has led to **1. _____** in different areas. For example, interactive whiteboards (IWBs) have promised to change the classroom experience. However, their positive **2. _____** depend on how they are used and maintained. Some educators remain **3. _____** of their effectiveness. One of the **4. _____** is the cost of IWBs. However, **5. _____** options are available for schools that wish to invest in these technologies. To **6. _____** the problems related to the use of IWBs, it is necessary to reveal the **7. _____** and statistics that support their benefits. With proper training, IWBs can be valuable tools that have the **8. _____** to transform modern classrooms. Moreover, they can be used as a **9. _____** that facilitates greater collaboration and learning opportunities. As such, IWBs can provide students with interactive learning experiences, empowering them to **10. _____** better and excel in their studies.

Note-taking sheet

Main Ideas	Notes *Answers/Definitions/Examples/ Sentences Questions/Main Ideas*

Section C: Reflective Writing	30 minutes	10 marks

Write a 150-word reflection on any idea from the reading or the listening section of this exam.

Your reflection should follow the DIEP model.

Marking Criteria:

Task achievement (6)				Organisation (2)	Lexical resources (1)	Grammar (1)	Total (10)
D (1)	I (2)	E (2)	P (1)
